## SUMMARY

---

Creative and detail-oriented **Full-Stack Software Engineer** with a background in hospitality and always seeks to improve user experience on any platform. Searching for a role where skills can be applied towards building innovative tools and applications with responsive modern UI standards.

## SKILLS

---

**Programming Languages:** .Net/C#, Python, Java, Javascript (ES6), Typescript

**Front-End:** Angular, ReactJS, Redux, Bootstrap, SASS, HTML5, CSS3, Tailwind

**Back-End:** Django, Flask, SpringBoot, JSON Web Token, Express, Node.js

**Database:** SQL, NoSQL, MongoDB, Firestore, Sanity

**Tools:** Git, Github, NPM, Postman, MAMP, Heroku, Amazon Web Services (EC2), Firebase

**Practices:** HTTP, RESTful APIs, Web App Architecture (MVC), OOP Design

## EXPERIENCE

---

**Full-Stack Developer Intern** | *Changing Room Start-up* | Remote 2021

- Collaborated with a small, dynamic dev team in a fast-paced, quickly changing environment.
- Worked with the UI/UX team to translate figma wireframe into responsive frontend web design.
- Designed custom algorithm to parse excel data using pandas from Data Science team and filter clothing based on eco friendly materials.
- Utilized gitlabs version control to update code with team members and to speed up the development cycle.

**Lead Sales Associate/Operations Manager** | *Hawaii Summer Tour Group* | Honolulu, HI 2014-2020

- Collaborated with sales associates to consistently reach sales targets and meet daily quotas.
- Provided exemplary customer service by individualizing support, providing prompt follow-up to ensure product satisfaction, resulting in great feedback and higher recognition.
- Managed all aspects of planning activities to scheduling the trip and finalizing the bookings.
- Confirmed proper quality control over satisfaction in overall trip experience to ensure positive service feedback.

## PROJECTS

---

**Global Covid Tracker** | [Github](#) | [Site](#) | **Tools:** Leaflet, Chart, React 2022

*Covid tracker that features line graph and map statistics on severity of global pandemic*

- Built React front-end to create responsive states that filter data to be based on country or rates if needed.
- Utilized npm leaflet and chart to dynamically display COVID 19 infection data on a clickable map and graph.
- Integrated API from disease.sh to generate reliable global and specific countries.
- Deployed using oogle firebase with Github for version control for future .

**Dojo Store** | [Github](#) | **Tools:** React, Redux, Bootstrap, Material-UI, MongoDB, Express 2021

*Ecommerce site signed for the Coding Dojo Bootcamp MERN Stack Project.*

- Constructed the database using MongoDB and Express to communicate with the frontend.
- the frontend using React-Bootstrap, and Material-UI for a responsive and modern user experience.
- Used Redux for state storage and management to implement a responsive shopping cart system for users.
- Utilized Github version control for efficient and collaborative team output.

**Recipe Finder** | [Github](#) | **Tools:** Django, Bootstrap 2020

*User-friendly web application for finding recipes based on a user's available ingredients.*

- Applied a combination of Bootstrap and CSS to create a user-friendly web design in HTML
- Used Django to create a functional backend with search engine for ingredients to recipes and proper redirects.
- Created an admin page to use all CRUD commands on the database for listed recipes.
- Utilized Github to collaborate as a team making push and pull requests with updates to code.

## EDUCATION

---

<b>Coding Dojo</b>   <i>Full-Stack Developer Certificate in Python, Java and MERN</i>	2021
<b>Harvard</b>   <i>CS50 Introduction to Computer Science</i>	2020
<b>Santa Monica College</b>   <i>Hospitality Management</i>	2019
